PART # AP30EAK

30" ALL PURPOSE EYE ANCHOR KIT INCLUDES:
FOUR 30" EYE ANCHORS
ONE 1/8" X 50' CABLE
FOUR 1/8" CABLE TIES

- 1. Install ground anchors as close to the building as possible at all four corners.**
 - A. Install anchors using a straight rod to turn (screw) anchor into the ground.**
 - B. A starter hole, up to 1/3 of the anchor length can be used to start anchor into the ground.**
 - C. Anchor eye should be just above soil level.**
- 2. Cable can be secured to the building using the following methods.**
 - A. Attach one end of the cable to an anchor using the wire rope clip. Cable goes thru the anchor eye and is clamped together using the wire clip. Place the cable over the roof to the opposite anchor, loop cable thru anchor eye. Cut cable to have enough to attach to the anchor. Pull cable tight, attach wire rope clip, tighten nuts. Repeat for other side.**
 - B. Attach cable to the side wall studs. Additional hardware required, bolts, washers nuts and wire rope clips.**
